close of his masterly address. Dr. Williams, after his laudatory remarks to the class, launched into his address, the subject of which could be termed "Happiness and Success", which he considered the two most important things one seeks in life. He took as the four corner stones of such seeking: Faith in God and Humanity; Health, Friendship and Wealth. On these four points he gave his philosophy as he expanded on the value of all four. The two musical selections rendered by the class group were very beautiful and entertaining. The school band also provided a number of selections.

Plans in View For New
Terminal Bus Station

L. E. Will has purchased the McWhorter property at the corner of First street and Avenue B, and has in mind a number of improvements for the corner. The McWhorter residence, last week, was picked up by the Miami house moving firm, and toted to its new location on Avenue E. Knowing the demand and need

for a better public bus station Mr. Will plans to erect such a terminal building on a portion of his new possession, but such plans are as yet unformed, but same will soon be placed in the hands of architects.

Mr. Will states that when the structure is erected it will be of commodious dimensions and will provide all modern arrangements for bus station facilities, both for the passenger and express business, and it will be used exclusively for that purpose. He also has the thought for accommodations of the future increases of business which is sure to come during the coming years.

Meters Good Producers

Count of the parking meter monies for the past three weeks showed a total collection of \$444.38; and overtime parking fines of \$50.70. The city at present has no intent of cutting out the parking fees during the summer season, as some people had hoped.

A number of merchants in locations where no meters are now placed have made application that the meter system be extended to take in their properties. Added new machines are to come soon for installation to make up the original order and these will be a new type of meter similar to the ones now in use in Lake Worth.

Island Landscape Company

We wish to thank our many friends in the Glades for the business which they have given us in the past and for their understanding and helpful attitude toward us during the years while we were mainly engaged in the preparation and maintenance of Airfields for the Army and Navy.

Once again we are able to resume peacetime operations and offer you the same efficient and courteous service which it has been our endeavor to render in the past. The service we offer is complete, from landscape designing to a finished planting job. Our Nurseries are stocked with a wealth of lovely trees, shrubs, vines, potted plants, etc., awaiting your selection.

We invite you to stop in and visit us at any time and will appreciate your continued business.

LET US CHECK YOUR TRACTOR

From Here to Here

Our mechanics will start at the radiator cap and work right back over your tractor. When they are through, you'll know the truth: Probably a few minor adjustments, a new grease seal—a plug or two will be all you need. But, if any part needs replacement, that fact will be discovered before it's done any damage that would cost you money and time.

OBSERVATIONS

Continued from page 1

ing conservation officers to see the men who like the outdoors, forming new organizations and clubs to help protect and propagate both game and fish. Personally there is nothing more enjoyable to me than just to take my cane pole some worms or live bait, and go out to some secluded spot and "nigger fishing". On the other hand there are many men who like the hunting of game and follow it as avidly as does the fish fan. But, if there are no conservation steps taken to protect the present supply of wild game and fish, there won't be any need to spend time in hunting and fishing. That is the reason why conservation clubs are now being urged by the State Commission, for if the club members work in conjunction with the Commission, then desired results will be forthcoming. Florida is entitled to its share of the millions of national license fees, but to date, little of it has ever reached Florida to aid in its fish and

game program. A state wide movement is afoot to see if a large sum of this Federal money cannot be secured for the state conservation programs.

Those hard worked postal department employees of Uncle Sam, after a long fight, are now rejecting the Congress and the President have provided them with a deserved advance in wages. Dating from January 1, of this year, new figures will be placed on Government checks, which will range as high as \$400 for a year.

After one reads articles in connection with the description of new industrial plant equipment and processes, the new words used by the word experts, we begin to wonder where they deduct or secure the words and spelling. When the men who study out new dictionary words for future issues of such compendiums, let they do a lot of mental and head scratching. Pretty tough on writers to know the uses and meanings of such words, let alone know how to spell them.

changes desired in enforcement regulations for the area represented. Everyone was anxious to see the hyacinths removed from the canals and that proposition hearing before the Army engineers at West Palm Beach, at which the club will have representation. "With hyacinths millions of fish will be exterminated during the coming summer, as in past years, but without this pesky waterway checker most would be able to reach the lake, there to spawn, and bring on a new and increased crop of fish for later use," said Captain Reector.
